WHAT MAKES US DIFFERENT?

In our Information Assurance line of business, Sybersense always takes a risk-based approach in support of our clients. Valuable Information is provided to our clients that will support advanced decision-making and early warning solutions that detect emerging threats and opportunities. This will help extend their risk management function across their enterprise. The NIST SP 800-37 'Guide to Applying the Risk Management Framework' coupled with continuous risk monitoring helps government sector customers better identify, manage and mitigate security risks.
